Washington, D.C. 20515

Dear Congressman Moakley:

This is in reply to your letter of March 4, 1993, in which you inquired on behalf of your constituent, Jason Wolfson, regarding the Notice of Proposed Rule Making (Notice) in PR Docket No. 92-235, 57 FR 54034 (1992). This Notice proposes comprehensive changes to the Commission's Rules governing the private

RE: PR Docket 92-235

Dear Senator Keating:

I am an avid Radio Control helicopter modeler. I have been involved with the sport/hobby since I was 15 years old. I am now 30 and credit much of my success as an engineer and entrepreneur to my hobby of R/C Helicopters. I compete on a national level. I currently own four model helicopters that I have built at a cost of between \$1,000 and \$2,000 each. I have a great deal of money invested in equipment. Much of this equipment would be unusable if this frequency assignment is adopted.

The Helicopters I build and fly weight 10-12 lbs and fly at speeds up to 90 m.p.h., with a five foot rotor span spinning in excess of 1700 rpm, these models pose a great danger if the pilot loses radio control of them. Since the new frequencies proposed are so close to the ones we already use, interference will occur, posing a major safety problem.

I am very concerned about proposed rules that are currently under consideration by the Federal Communications Commission (FCC). The

careful coordination and use of the radio control frequencies. If the number of usable frequencies is diminished as proposed by the FCC, the remaining frequencies will become congested and the margin of safety will be greatly decreased.

Please understand that we often fly our models at organized events and contests where hundreds of operators participate. We need the use of our full complement of radio frequencies in order to assure a safe flying environment.

I do not think it is wise of the FCC to seek to improve the operating condition of land mobil radio users at the expense of radio control modelers. The FCC may not think we are as important as business users of radios, but we have a considerable investment in our models and in our radio equipment. The hobby provides many hours of enjoyment to thousands of people like myself and contributes to the advancement and development of the commercial aviation industry.

Please help me continue the safe enjoyment of my pastime by not allowing the FCC to carry out its proposals for the 72-76 MHz band.

Sincerely,

Jason Wolfson

March 8, 1993

Honorable John Joseph Moakley  
Member of Congress  
World Trade Center, Suite 220  
Boston, Massachusetts 02210

Dear Congressman Moakley:

Thank you for contacting our office on behalf of  
Jason Wolfson, 42 Eastman Street, Easton, MA 02334.  
He is concerned about PR Docket 92-235 and the changing  
of frequencies assigned for use with model aircraft.

Your inquiry is being forwarded to the Chief, Field  
Office Bureau for coordination with the appropriate staff  
at our headquarters office in Washington, D.C. You should  
receive a response within the next thirty (30) days.

Sincerely,

*Hilda Robb*
